	70%	3.69%			
	75%	3.85%			
	80%	3.95%			
	85%	4.15%			

### Credit Criteria

Adverse Credit	0 in 36 months.
Bankruptcies and IVAs	No bankruptcies or IVAs registered against any borrower.

Some of the reasons for these mainstream misses could be:

Address history	A clean address history is key to ensuring your clients maintain a good credit score. Clean address history means where the credit is registered, so those that are not on the voters role at their correct address or frequently move will generally have a poorer score.
Credit Hungry	Those that have frequent credit searches conducted against them, this could be anything from a mortgage to a new mobile phone. More than 4 searches in a 12 month period moves the score significantly.
Credit Utilisation	Those that heavily rely on credit cards will be seen as indebted and their score affected accordingly. Exceeding 60% of their credit limit affects the score significantly, exceeding 75% will double this negative impact.
Financial Association	Even if your clients is a perfect customer, if they have a linked associate (whether it be a past personal or business relationship) and their score is bad your client's score will also be impacted.
Historic CCJs/Arrears	Any arrears in the last 3 years will significantly impact your clients score. Even a single missed payment in the last 12 months will have an effect. F1 does not allow that but historic ones will be considered.

## Residential F2

Our F2 product is for clients with recent credit blips.

### Product Details

Product	LTV	Rate	Fee	ERC	Reversion Rate
